

Abdirahman Haji

EXPERIENCE

Helius, Remote — Senior Software Engineer

MAY 2024 - Present

Stack: JavaScript, TypeScript, React, Nextjs, React Router, TanStack Query, Tailwind CSS, Remix, Golang, AWS, CI/CD

- Spearheaded end-to-end development of Helius' developer portal as the sole developer using React/Next.js, creating a unified UI/UX that became the primary interface for onboarding hundreds of enterprise customers and tens of thousands of developers to Solana infrastructure
- Architected full-stack user-management systems including auth, multi-currency billing (crypto/fiat), project tools, leading a 3-person team to maintain product, backend, DevOps (AWS), and databases
- Partnered directly with CEO, COO, and business/product leadership to align technical execution with company strategy, driving prioritization of high-impact features for developer experience and revenue operations

Google, Chicago, IL — Software Engineer III

AUG 2021 - May 2024

Stack: JavaScript, TypeScript, Node, Angular, Java, Python, and RPC

- Helped pioneer the transition from monolithic architecture to micro-frontends for Google Search features, enhancing modularity.
- Developed an AI-driven UI Agent, streamlining the creation of Google Search features and enhancing user experience.

Intuit, Mountain View, CA — Software Engineer II

AUG 2019 - JUL 2021

Stack: JavaScript, TypeScript, React, Angular, Node, Java, MongoDB, SQL, Express, Jest, AWS, and RESTful APIs

- Re-engineered platform UI to React, significantly improving user experience. Collaborated in full-stack development, equipping thousands of engineers and marketers with experimentation tools.

EDUCATION

University of Minnesota, Twin Cities — B.A. Computer Science

Graduated: May 2019

Greater Chicago Area
(952) 215-7370
